

CORNING

With Corning® CleanAdvantage™ technology we take care of the cleaning process for you!

As a leader in optical fibre and connectivity, Corning understands the value of clean connectors to ensure optical performance. So much so that we have developed a new factory cleaning and sealing process, Corning® CleanAdvantage™ technology, to ensure a pristine end face upon first use for all our EDGE™ and EDGE8® solutions. Thus, saving you as the installer time and money during the initial installation. So go ahead and uncap that CleanAdvantage connector so that you can connect with confidence.

Save up to **17%** install time

No need for cleaning or visual inspection before the first install.

Save up to **95%** on consumables

No cleaning pens, cassettes, and wipes necessary.

Minimizes debris transfer

Reduces the risk of debris transfer on the end face, minimises signal degradation.

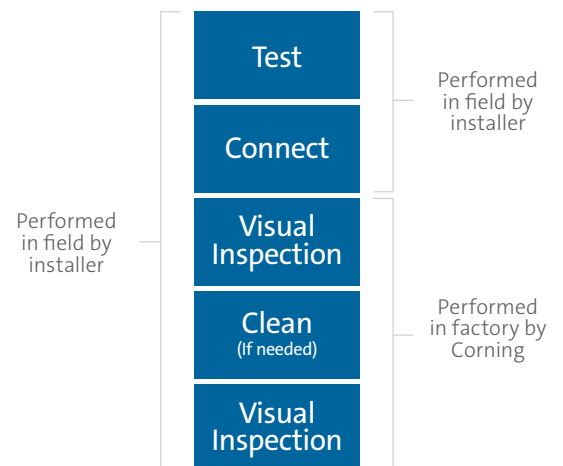

Standardized offering

High density paired with high performance at no extra cost.
